WORK EXPERIENCE

Google STEP Intern

Google, Inc | Google Fi | Fraud and Abuse Team

May 2024 – Aug 2024

San Francisco, CA

- Engineered a high-performance multi data-processing C++ pipeline using Google's internal tools to extract data about fraudulent Google Fi users. Reduced real time latency by 90 percent.
- Implemented robust data validation to ensure data integrity and proactively address potential issues.
- Developed comprehensive unit testing and monitoring tools to maintain pipeline health.
- Produced a data visualization dashboard to track key metrics and monitor historical and statistical data generated by the pipeline output.
- Documented project with detailed description of workflow, visuals, background information, impact, implementation, alternative solutions, and future scalability.

Frontend Developer Assistant Intern

Acorn Genetics

Sept 2022 – Jan 2023

Chicago, IL

- Generated a responsive landing page using React.js and Next.js for the company's corporate website.
- Integrated a UI/UX design for the website platform by migrating 100 percent of the existing code from Python to React.js.
- Researched frontend development practices to simplify the existing codebase.

Coding Club President

CompSciKids

May 2021 – May 2023

Chicago, IL

- Responsible for in-club recruiting, training and community outreach for the club.
- Pioneered the creation of an elementary-level computer science curriculum, which included arduino projects, javascript, and block code.
- Served 50+ hours and maintained excellent delegation between club board and general participants. Therefore, allowing fluid transportation of club resources and successful event planning.

PERSONAL PROJECTS

MPlate (Mom's Plate) App

React Native, Firebase

Jan 2023 – May 2023

Chicago, IL

- Constructed a React Native grocery/social outreach app for working mothers with a home page that displays data from the database. Added a list feature to create a grocery list and showcase recommended recipes by other app users.
- Implemented Firebase authentication and Firestore to store data and allow users to retain and gain smooth access to their private data. Used these data to regulate multiple users within the app.
- Conducted three focus groups of 10 people composed of the target audience of the applications to brainstorm and validate the ideas of the applications.

The Real Realtor

React.js, CSS, Firebase, Figma

Jan 2022 – Feb 2022

Chicago, IL

- Built a React front-end for real estate agents and house buyers that allows agents to make secure accounts with Firebase Auth and SSO. Also allows posting available houses, and displaying available houses in a selected community.
- Created nested React navigation's to search and filter through listed houses and buy/sell property features.
- Integrated Figma developed the user interface / user experience during the development phase and presented the project idea to the target audience.
